Goals

The main goals for this slide:

▶ This is just to show you how this *template* works

▶ There are two 'emphasize' functions used to highlight & italicize texts

  ▶ '\empy' does *this* and '\empr' does *this*.

▶ The colors in this template is selected from the official Stanford Identity website: https://identity.stanford.edu/color.html

▶ Note that hyperlinks, by default, are not highlighted. Of course, you can change this: e.g., *https://github.com/sanhacheong/stanford_beamer_presentation*

Example

A (hopefully) useful function in this LaTeX-template (Cheong (2018)) is:

$$\exists \text{examplebox}\{\text{ExampleTitle}\}\{\text{ExampleContents}\}$$

which does this:

> **Example of the Command \examplebox**
>
> This is what it does. Pretty self-explanatory, isn't it?
> Given the color them, I *recommend* using \empr inside of
> examplebox. The \empy command does not look *that* good.

Cheong, S. 2018. *My Research Software*.
